Many universities and educational institutions have made efforts to develop mobile learning platforms, allowing students to attend online courses. The features of the current mobile campus include interactive learning tools, and mobile apps that facilitate access to educational resources.

Learners have different attitudes toward the use of new technology, and the research trends in mobile and ubiquitous learning reflect these diverse perspectives. A review of recent publications highlights the impact of new teaching approaches on student engagement and academic performance. The efficacy of these approaches is irreducibly tied to the attitude of the teacher, views, and concerns about the world, and the ability to download and utilize current information beneficial for classroom use.

Resources in the 21st century, particularly those related to global development, are increasingly scarce. Golden Fleece: Higher Education and the New Society of Third Millennium discusses the evolution of higher education in the 21st century, highlighting the importance of new research programs in emerging areas, and the need to consider new EU member states. Access to information and technology also raises significant concerns, particularly in the context of the current global financial and economic crisis, which has undermined development in the least developed countries.

The crisis has highlighted the need for better job opportunities, improved health, and enhanced technology transfer. In that context, several delegates have emphasized the importance of a new approach to achieving the Millennium Goals. As some of the country's Millennium Goals were still off track, the country has focused on preserving its position concerning the media and education. The New Millennium Learners (NML) project promotes the use of technology to enhance and improve current practices, and connect with the leading centers of public interest.

Figure 1.12: Top 250 ICT firms' employment trends, 2000-09. The research and development in technology should be used to enhance and improve current practices, and connect with the leading centers of public interest.
